

# CELLEBRITE EVIDENCE REPAIR TECHNICIAN-FORENSICS (CERT-F)

## Mobile Forensics

### Course Description

Cellebrite Evidence Repair Technician - Forensic (CERT-F) is a five (5) day expert level course designed to teach investigators how to repair mobile phones to complete data extractions in a forensically sound manner. In this highly interactive course, students will learn best practices and how to replace key components on mobile devices and USB flash drives using proper disassembly and reassembly techniques. Students will learn how to use proper heat and basic soldering techniques to repair or replace components that include but are not limited to inoperative data and charging ports, broken LCD screens, power buttons, "home" buttons and other parts.

# Course Learning Objectives

---

- Become familiar in properly diagnosing and repairing mobile device evidence.
- Learn best practices while replacing key components on mobile device evidence.
- Learn proper use of heat and manual soldering skills to replace defective or broken components.
- Obtain CERT-F certification by passing a practical competency exam.

## Note

---

The successful completion of this course is defined as the student being able to demonstrate proficiency in the course learning objectives by passing a final assessment with a minimum score of 80% or higher AND completing an independent practical.

While this course has no prerequisites, the completion of both CCO and CCPA is highly recommended.

This course is part of the Cellebrite Certified Recovery Specialist (CCRS) track. The full track requires the completion of CCO, CCOF, and CERT-F to qualify for the CCRS exam.

## Empowering Justice through Expert Digital Forensics Training

Cellebrite Training is a leading provider of digital forensics education, offering a comprehensive suite of courses designed to empower professionals in mastering the techniques, tools, and methodologies essential for navigating the complexities of digital investigations.
