RECERTIFICATION FOR CELLEBRITE CERTIFIED OPERATOR FOR INSEYETS

Course Description

CCO Inseyets Recertification is a four-hour recertification course for anyone who has previously certified with the legacy CCO course. This recertification introduces the latest features of the Inseyets UFED platform that were not available in legacy UFED software.

Participants will review the advanced extraction capabilities of Inseyets UFED. This includes unlocked and locked workflows for gaining access to iOS and Android devices in the Before First Unlock (BFU) or After First Unlock (AFU) state. Learners will be introduced to the latest Inseyets features that create workflow efficiencies. Among these are new techniques for triaging, streamlining, and automating workflows using Triage, Quick View, Streamline, and Autonomy. Finally, participants will explore post-extraction considerations and the implications of using the new Inseyets Case-to-Closure (C2C) platform.

Participants will earn the CCO Inseyets certification upon passing a knowledge test and practical skills assessment with a score of 80% or higher.

Level	Length	Certification Track	Delivery Mode
Intermediate	Half-Day (4 hours)	CCME	Self-Paced

TRAINING

Course Learning Objectives

By the end of the course, participants can:

- Describe the benefits of triaging mobile devices prior to conducting an extraction.

- Use Inseyets UFED to perform advanced extraction techniques for Android and iOS devices.

- Apply automation features using Streamline and Autonomy.

- Identify options for decoding, storing, accessing, sharing, and safeguarding evidentiary data post-extraction.

Notes

This course is intended only for participants who are currently certified in the legacy CCO course material and are seeking certification in CCO Inseyets. The CCO Inseyets Recertification course renews the certification for two (2) years. The contents of this course are subject to change as the Inseyets platform is updated.

Empowering Justice through Expert Digital Forensics Training

Cellebrite Training is a leading provider of digital forensics education, offering a comprehensive suite of courses designed to empower professionals in mastering the techniques, tools, and methodologies essential for navigating the complexities of digital investigations.
