

# RECERTIFICATION FOR CELLEBRITE CERTIFIED PHYSICAL ANALYST FOR INSEYETS

## Course Description

CCPA Inseyets Recertification is a four-hour recertification course for anyone who has previously certified with the legacy CCPA course. This recertification introduces the latest features and settings of the Inseyets PA platform that were not available in the legacy PA software.

Participants will navigate the Inseyets PA interface and explore the newest enrichment and decoding capabilities for artifacts such as media origins, media classifications, cryptocurrency, and locations. Learners will review the Inseyets Case Management workspace, the updated Cases view, the Inseyets PA Dashboard, and the improvements made to processing Cloud data artifacts, Apple warrant returns, and cryptocurrency. This course also gives an overview of Commander, which is an add-on to the Inseyets suite.

Participants will earn the CCPA Inseyets certification upon passing a knowledge test and practical skills assessment with a score of 80% or higher.

# Course Learning Objectives

---

By the end of the course, participants can:

- Identify the new Inseyets PA capabilities and their benefits in modern forensic investigations.
- Employ the recommended settings and configurations to ensure analysis integrity.
- Explore new or improved data artifacts, such as cloud data, crypto data, Apple warrant returns, and other data sources available and their forensic implications.

## Notes

---

This course is intended only for participants who are currently certified in the legacy CCPA course material and are seeking certification in CCPA Inseyets. The CCPA Inseyets Recertification course renews the certification for two (2) years. The contents of this course are subject to change as the Inseyets platform is updated.

## Empowering Justice through Expert Digital Forensics Training

Cellebrite Training is a leading provider of digital forensics education, offering a comprehensive suite of courses designed to empower professionals in mastering the techniques, tools, and methodologies essential for navigating the complexities of digital investigations.
